### Training

Different levels of employees are imparted different sets of learning skills and ultimate competency levels for better control, communication and cooperation.

There are training packages meant for different cadres of employees such as:

- A. Workers
- B. Supervisors
- C. Managers

## Arbrit Training Services

Arbrit offers Health, Safety & Environmental courses to meet your organisational objectives which are customized as classroom based and on job training for ultimate effectiveness.

- Arbrit is accredited by international organizations working in the occupational health and safety realm and we offer the internationally accepted and most preferred Training programmes like IIRSM, NEBOSH, IOSH, OSHA & MEDIC FIRST AID
- It specializes in offering Safety Training courses to employees and students.
- Training can be provided to employees working in various industries – including construction, oil and gas or any other
- Has a track record of training over 15,000 delegates every year.
- Has experience in offering training programmes to a highly diverse set of participants, ranging from Fresher's to Safety Managers in organization.

## Customized safety training - Highlights

The trainers & experienced Consultants present fully interactive courses in easy-to-read PowerPoint slides and accompanied by user-friendly materials designed after a comprehensive study of the organization needs:

- Evaluate/Compare existing safe work practices, policies & procedures.
- Develop new and/or enhance existing training programme.
- Train all levels of employees (upper management to line worker) or 'train-the-trainer'.
- Assessment of the competency level attained.
- Maintain training records.

Flexible training programme is also available as per organisational needs focusing various departments:

- Administration
- Management
- Engineering
- Discipline

During Training, we examine the five essential steps for successful management with focus on Improvement and implementation of recommendation. The focus areas outlined are:

- Policy
- Planning
- Implementation
- Checking & Corrective Actions
- Management Review

Our experienced & well qualified consultant will work closely to:

- Enhance productivity of industry in all aspects.
- Provide Customized training to meet organisational objectives.
- Chart out exclusive emergency response plan.
- Identify your waste streams
- Develop a list of appropriate recommendation with priorities
- Develop a time frame in a detailed action plan.

# Documentation Management

- Documents form a valuable reference for gap analysis and statistics from which the current level of performance in terms of safety, health and environment can be analyzed.
- It also forms a legal statutory compliance document from which commitment of the organisational management and its associates can be determined.

## ❖ NEBOSH (National Examination Board in Occupational Safety and Health)

### ✓ **NEBOSH - IGC**

The NEBOSH International General Certificate is a highly respected and recognized qualification, which will benefit organizations operating outside the UK, and multinational companies working to international standards who are seeking to implement good health and safety management across areas of their operation.

### ✓ **NEBOSH – Technical Certificate in Oil & Gas**

This qualification is designed specifically for those with safety responsibilities in the oil and gas industry. The qualification focuses on international standards and management systems, enabling students to effectively discharge workplace safety responsibilities both onshore and offshore

### ✓ **NEBOSH – HSW**

This introductory qualification will help improve the safety culture in your organization, by equipping your workforce to identify and deal with hazards at work helping to reduce accidents and achieving cost savings for the business. This qualification is an ideal first step towards other higher level NEBOSH qualifications including NEBOSH's International General Certificate and National General Certificate

## Institution of Occupational Safety and Health(IOSH)

The IOSH Working safely/managing safely Certificates are aimed at all employees and is designed to improve the safety culture within an organization. It focuses on how individual actions contribute to health and safety in the workplace and provides an understanding of an individual's responsibilities.

### ✓ **IOSH – Managing Safely**

IOSH Managing Safely course has been designed to meet the needs of Managers and Supervisors from any organization, who are required to manage employees and their work activities, in compliance with the company's safety policy Health and Safety legislation.

### ✓ **IOSH – Working Safely**

The IOSH Working Safely Certificate is aimed at all employees and is designed to improve the safety culture within an organization. It focuses on how individual actions contribute to health and safety in the workplace and provides an understanding of an individual's responsibilities.

## ❖ OHSAS 18001 Lead Auditor

OHSAS 18000 is an international occupational health and safety management system specifications. OHSAS 18001 represents an international consensus on what organizations should manage with respect to occupational health and safety, no matter where they are in the world or what sector they operate in. It is intended to help an organizations to control occupational health and safety risks. It was developed in response to widespread demand for a recognized standard against which to be certified and assessed. It focuses equally on occupational ill-health as much as safety as it recognizes that increasingly, occupational ill-health is becoming an equally significant cause of human misery and cost to organizations, society and the economy of the country.

## ❖ **ISO 22000 – Food Safety Management System**

ISO 22000 deals with the fundamentals of food safety management systems. The ISO 22000 family of standards relates to food safety management systems and is designed to help organizations of any size and at any stage in the food chain to ensure they meet the needs of customers and other stakeholders.

## ❖ **HACCP (Hazard Analysis Critical Control Point)**

Hazard Analysis Critical Control Point system, is a process control system that identifies where food safety hazards may occur in a food production process and puts into place stringent controls to prevent the hazards from occurring.

### ✓ **HACCP – Level 2**

HACCP qualifications provide candidates with the knowledge they need to understand the principles of HACCP, in particular how to identify and control hazards, to monitor controls and what action to take when critical limits are breached. They will also appreciate how their role can affect food safety and how they can contribute to the HACCP system and product safety.

### ✓ **HACCP – Level 3**

The Level 3 Award in HACCP qualification further expands on the fundamentals of the Level 2 Award. Those Achieving this qualification will understand how the 12 Codex steps to HACCP contribute to safe food production.

## ❖ **Food Safety (Level 1, Level 2 & Level 3)**

Food safety law requires all food handlers to be trained according to their food handling work activities. These Qualifications in Food Safety will assist food business operators to demonstrate that food handlers have been trained in food hygiene matters appropriate to the work that they do and therefore comply with their legal requirement.

### ✓ **Level 1 Award in Food Safety**

The Level 1 Awards in Food Safety have been developed to ensure that employees from all food sectors are equipped with a basic knowledge of food safety to enable them to produce safe food. The qualifications will suit a diverse group of students including those from large multinational companies to small and medium enterprises.

### ✓ **Level 2 Award in Food Safety**

The level of qualification chosen will depend on the type of food production taking place and the level of responsibility of the food handler

### ✓ **Level 3 Award in Food Safety**

Level 3 Qualifications ensure that supervisors / line managers are aware of the legislation applicable to food safety and how to best communicate the required standards to employees.

## ❖ **Medic First Aid International**

Medic First Aid course covers the basic First Aid, CPR ,AED and Emergency care skills. Medic First Aid training programs are recognized throughout the world by governments, associations and corporations as meeting regulatory requirements for work place safety and health.

## ❖ **Defensive Driving**

Defensive Driving Courses are the most effective training for changing driver behaviors to prevent traffic crashes, injuries and deaths. This course is for experienced licensed drivers; organizations that want a driver improvement course for their employers
